AGUAPURE BY AGUABEL

**Go swimming in healthy,
crystal clear water**

Carefree swimming starts with clean pool water

Carefree swimming with the whole family? That starts with crystal clear, healthy swimming pool water. An oasis of relaxation without the intrusive chlorine smell and taste, and other substances of the swimming pools of yesteryear? It's possible thanks to the unique water-disinfecting Aguapure technology from Aguabel.

For new and existing swimming pools

An Aguapure system can be integrated into the construction of a new swimming pool, but can also be added to an existing swimming pool. All that is required is for a venturi to be placed in the injection pipe.

Aguapure appliances

We implement our unique technology in different appliances, depending on the required capacity. We provide sustainable solutions for different capacities.

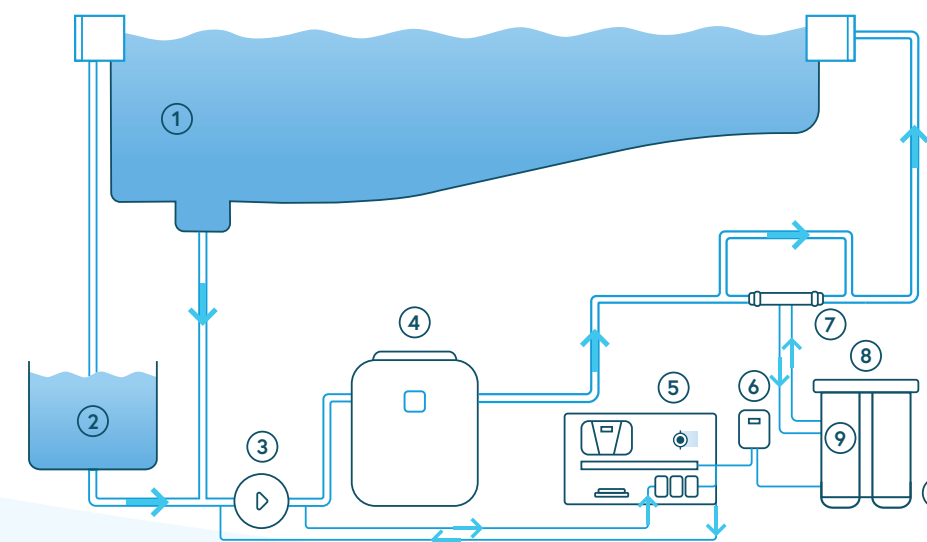

AGUAPURE COMPACT 5/10/18
AGUAPURE 20/40/60/80

Why choose Aguapure water disinfection?

- ≈ **Extremely soft water**
 Eye and skin irritations are a thing of the past, as are allergic reactions to swimming pool water or an intrusive chlorine smell. Safety asset!
- ≈ **Non-corrosive**
 There is no salt in the pool water, so the water is not corrosive. Safe for all pool parts and accessories.
- ≈ **Maintenance friendly**
 Fully automatic system with low maintenance costs. Add salt to the unit only sporadically.
- ≈ **The purest water**
 Advanced cell membrane electrolysis technology for the purest water... Made in Belgium.

Sample Setup Aguapure

1. Swimming pool
2. Buffer tank
3. Pump
4. Sand filter
5. Measuring system
6. Control/steering box
7. Venturi
8. Aguapure unit
9. Venturi connection
10. Drain

Safe for young and old

The result of this high-tech process? Crystal clear, healthy and hygienic water that is perfectly disinfected. The water is 100% bacteriologically sound. Safe for humans, animals and the environment. Allergies and skin irritations don't stand a chance. The typical unhealthy, chemical chlorine smell and taste? Gone forever!
